

# PCI Compliance Overview

Over \$1 Billion in Booth  
and Sponsorship Sales  
Processed Annually

## Key Benefits

- Avoid hefty penalties and fines
- Safeguard the information of the people who trust you
- Maintain the strength of your brand and reputation
- Protect your organization from security breaches

The a2z systems that are trusted to help process that billion dollars a year are compliant with Payment Card Industry (PCI) Data Security Standards (DSS). This certification helps assure your association members, exhibitors and event attendees that their credit card account information is safe. Qualifying and retaining PCI

compliance isn't a piece of cake, but is proof that you should require from any vendor or supplier. It's just smart risk management.

Handling credit card account information means that you are responsible for safeguarding that data and could be held liable for security compromises. The variable fines that accompany non-compliance can be very costly. Some have been up to hundreds of thousands of dollars. Talk about a blow to your bottom line! Can you imagine what a breach could do to damage your reputation in your market or industry?

The a2z team works hard at keeping our solutions PCI compliant, so you don't have to. Our live systems are scanned every month. We adhere to a regular, annual review process to maintain our certification. This ensures that all the account information in your a2z system abides by the highest data security standards.

Managing a billion dollars a year in transactions gives us the volume, track record and experience to give you peace of mind.
